### **NATO Stock Number Coffee Items**

#### **OCC C4 Coffee Capsules**

Our C4 blend of selected 100% Arabica beans gives you a coffee boost. When you add the “detonator” hot water to the coffee it immediately releases the great taste that will explode in your mouth when you drink it. Always remember the golden rule: “P is for Plenty”!

C4: Composition C4 Plastic Explosive.

The preferred choice of explosive by operators, because it can be carried safely to the target and is easily molded into any desired shape. The modeling clay texture makes it the multi-tool of explosives. C4 is very effective for breaching a locked main entrance of a house or blowing a precision hole in almost any material. After a successful explosion at the designated target, the best cup of coffee awaits the operators.

Power-O-Meter: 60/100.

Roasted and ground coffee, packed in a modified atmosphere in capsules.

Reference number: 5700002088222

EAN: TBC

NSN: 8955-22-631-5096

## OCC HALO Coffee Capsules

Our HALO blend takes you to where the coffee angels sing. The scent of freshly made coffee strikes your nostrils and the taste of coffee gives you the same kick as 100% pure oxygen. You become clear-headed, while the clarity of colors and the contrasts in objects are boosted on your retinas. Now you are ready to take on all the challenges of a brand-new day.

HALO: High Altitude Low Opening.

A special forces insertion technique by parachute, where the operators will exit the airplane from 10.000 meters altitude into an outside air temperature of -50 degree Celsius. The lack of oxygen at high altitude requires the operator to breathe through an oxygen mask during the 2:30 minutes long free-fall. After a successful landing the best cup of coffee awaits the operators.

Power-O-Meter: 90/100.

Roasted and ground coffee, packed in a modified atmosphere in capsules.
